RE: Alex Kaiser

To Whom it May Concern,

It is my pleasure to write this letter on behalf of Alexander Kaiser. I have taught Alex in a junior level embedded design course, a junior level systems and signals course, and I was his group advisor for his senior design.

Alex is a mature, intelligent and easy to work with student. I know what to expect from his work as he always produces top quality reports and always finishes in the top 10% of my classes. I appreciate Alex as he is serious with his work. He seeks clarification when necessary, but is not afraid to find the best solution before asking questions.

Alex and his partner were my top students in my embedded class. When I got assigned to Alex's senior project, I was relieved, as I knew I didn't have a lot of work to do. Alex works great in groups of various personalities and can be trusted to work on his own. He genuinely likes to learn, and I hope he will someday further grow his career by pursuing a graduate degree.

I have worked a couple decades in industry, and I see in Alex the qualities of an engineer who would be a great addition to any engineering team. I have also worked on college recruiting teams from industry, and Alex checks all the boxes with his experience, grades, attitude, maturity and drive.

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

Dr. Brian Krug .
